# Drought Resilience Tips

*Utah is a desert. We are either in drought or preparing for the next one. Everyone needs to do our part by always using water efficiently to ensure resilience. Whether wet or dry, let's stretch our supply!*

### Water less & when it's coolest

Follow the Division of Water Resources' [Weekly Lawn Watering Guides](#). Don't water between 10 a.m.-6 p.m. in Northern Utah, or between 10 a.m.-8 p.m. in Southern Utah.

### Raise your mower

Set blades at 3-4" to shade roots, reduce evaporation and promote a more drought-tolerant root system

### Prioritize your watering

1

Trees

2

Shrubs

3

Perennials

4

Annuals

5

Turf grass

### Don't water when it's windy

Winds above 5 mph increase evaporation

### Get an incentive or rebate through [Utah Water Savers](#)

- Landscape conversion: up to \$3 per square foot
- Smart irrigation controllers: up to \$75
- Toilets: up to \$100

Check with your local water provider
